

STATE LICENSURE DETERMINATION

Direct Notice Policy for Programs leading to Licensure or Certification

Sacramento Ultrasound Institute (SUI) determines the student's physical location during the admissions process. Applicants share their address on the Application for Admission. Their address is verified through government issued ID that is collected as part of the admissions process. Students located outside of California are not accepted into Sacramento Ultrasound Institute.

Sacramento Ultrasound Institute provides direct notice as to the determination of qualification for licensure for states outside of California via email.

Students at Sacramento Ultrasound Institute are able to update their personal information, including address, in the Student Information System, LearnSUI. Please note, students must notify the institution if they plan to relocate out of state. The institution is only approved to operate in the state of California. Relocating out of state may adversely impact a student's ability to complete their program. Students must submit the Change of Address Form to the campus prior to relocation. Students are encouraged to speak with SUI staff prior to relocation to determine options for continuing training or withdrawing prior to moving outside of California.

If a student moves out of California, or if the determination of qualification for licensure for a state on the list changes, Sacramento Ultrasound Institute provides Direct Notice to all students. Direct Notice is provided via email within 14 days after the day the change in determination is identified by SUI.

State by State Disclosure for Programs leading to Licensure or Certification

Sacramento Ultrasound Institute has determined if the program meets the educational requirements for specific state licensing or credentialing required for employment. The following information identifies the programs offered at Sacramento Ultrasound Institute and if the program curriculum meets state education requirements for licensure, does not meet state education requirements for licensure or if the institution has not determined whether the curriculum meets the state educational requirements for licensure.

Cardiac Sonography

Cardiac Sonography licensure or certification is not required for employment in the state of California. Although licensure is not required, a list of states along with a determination on whether or not Sacramento Ultrasound Institute's Cardiac Sonography program meets professional licensure education requirements is provided below.

State Name	Does Curriculum meet Educational Requirements for Licensure?

Radiologic Technology

The Radiologic Technology program is approved by the California Department of Public Health and qualifies graduates to apply for the state exam in California. Graduation from the program does not guarantee passing the state exam and earning licensure in California or in any other state. Licensure is

required to work as a Radiologic Technologist (RT) in California. Licensing requirements are shared with prospective students during the admissions process. They can also be found on the California Department of Public Health: [X-ray and Nuclear Medicine Certification FAQs](#).

A list of states along with a determination on whether or not Sacramento Ultrasound Institute’s Radiologic Technology program meets professional licensure education requirements is provided below.
